PEOPLES COMMUNITY RESOURCE CENTER !!

The board and staff of People’s Health Centers is excited to share with the community that a New Peoples Community Resource Center will be built at 5635 Delmar Blvd.

The center will allow greater access to, and house community requested services. In essence, the center will be where health, wellness and community come together!

The community resource center will be a 3 story multi-level building designed to provide a centralized hub for a diverse range of community services including: access to essential needs for food assistance, job training, healthcare navigation, financial literacy programs, mental health staff and social support services, all within welcoming and accessible spaces spread across three floors, often catering to different demographics or even service types.

We specifically designed the center to serve a diverse range of community need. The ground floor hosts accessible features like a reception area, service cubicles and a cafeteria. The second floor has dedicated spaces for activities like classrooms, meeting rooms and greater access to critical behavioral health staff with the third floor for job interviews, job readiness training, with a call center and individual focused services, all designed to foster social interaction and provide a central hub for residents of varying ages and interests. Overall, the center will host a wide range of programming for people of all ages and abilities with a focus on assistance to families. The community will be pleased that the center houses resources from food assistance to educational programs, housing support to healthcare services.

The Peoples Community Resource Center will be a focal point for families and serve as an anchor for future revitalization of the area. We strive to empower individuals and families to achieve self-sufficiency and thrive. People’s does not receive United Way funding, so join us on this journey and help make a difference in the lives of those we serve. Donate now.
